

Confidential Information Management System (CIMS)

A Project Proposal
By

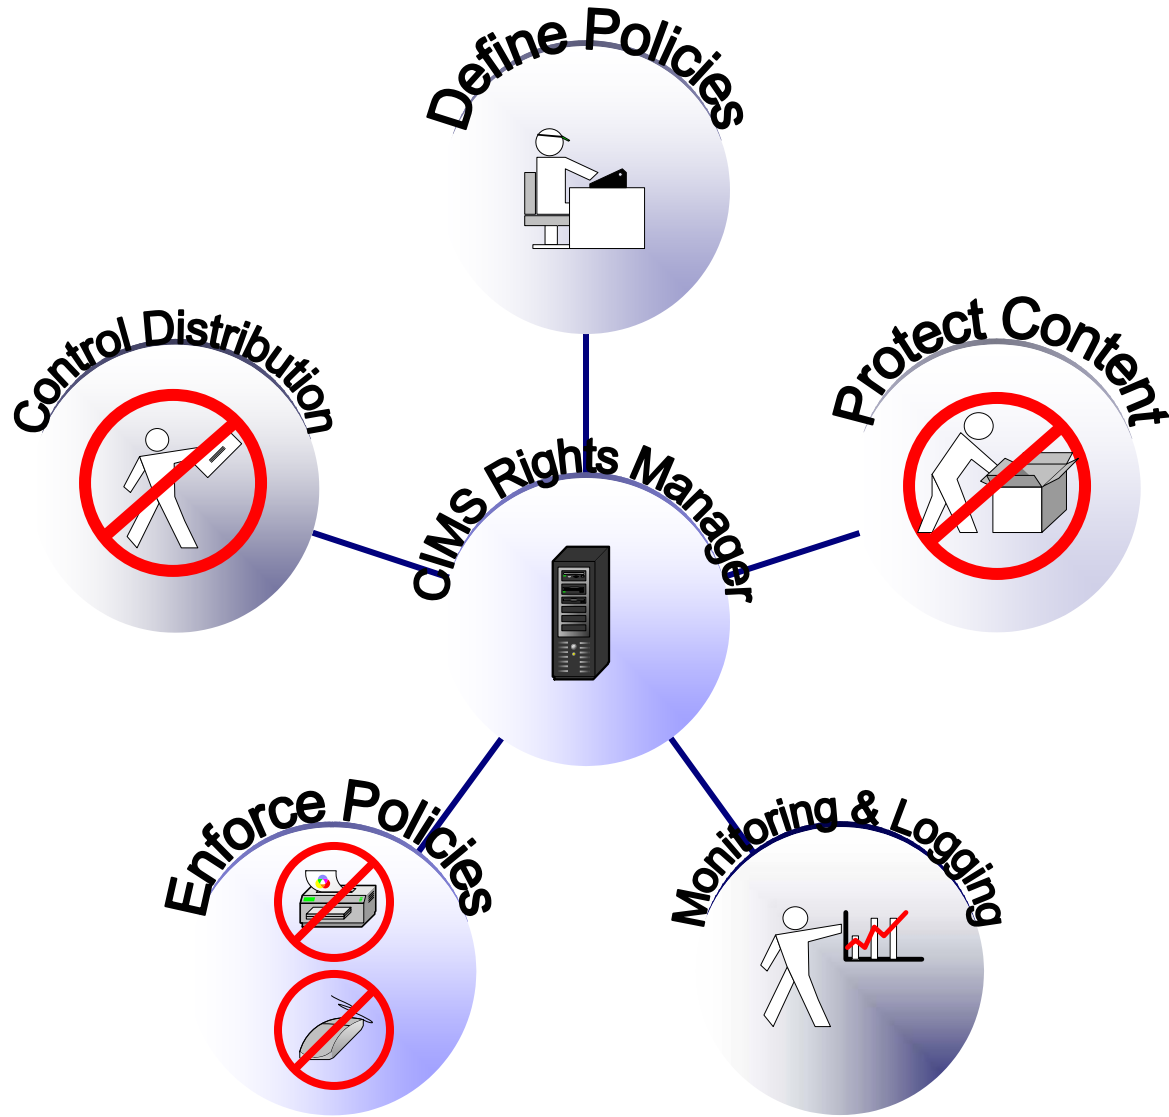

IJI TECHNOLOGY

- Protect your confidential material from:
 - Accidental misuse
 - Unauthorized/malicious distribution
 - Employee theft
 - Inaccurate modification
 - Use out of context
- Maintain integrity, availability, and confidentiality

- Grant access and/or usage rights according to your chosen criteria
 - Who can access it?
 - When can he/she access it?
 - What he/she can do with it?

- Allowing different internal or external users or user groups to access and use different content to different extent
 - Control printing
 - Control document saving rights
 - Control copy and paste
 - Control e mail rights
 - Prevent screen capture
 - Determine time during which access may be granted
 - Allows monitoring of user activity and content use
